eagle IN-FLIGHT SECURITY TRAINING

COMPUTER-BASED TRAINING (CBT)

The In-flight Security course is designed to train aircrew to prevent and respond to potential in-flight threats. It is a collaboration between ICTS Europe, specialists in computer based training, and Green Light Ltd, specialists in in-flight security training.
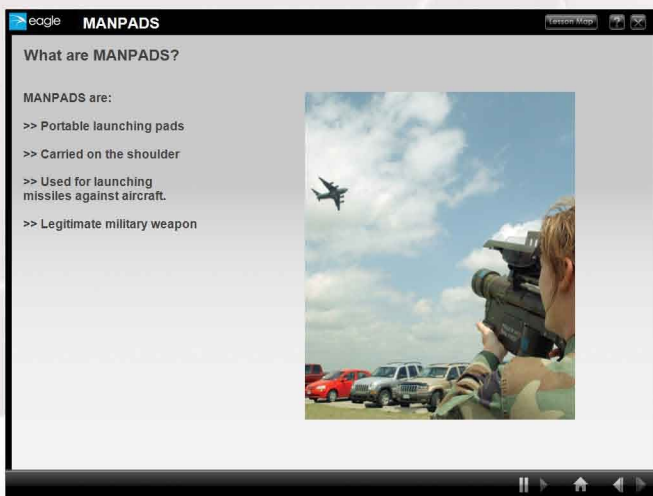

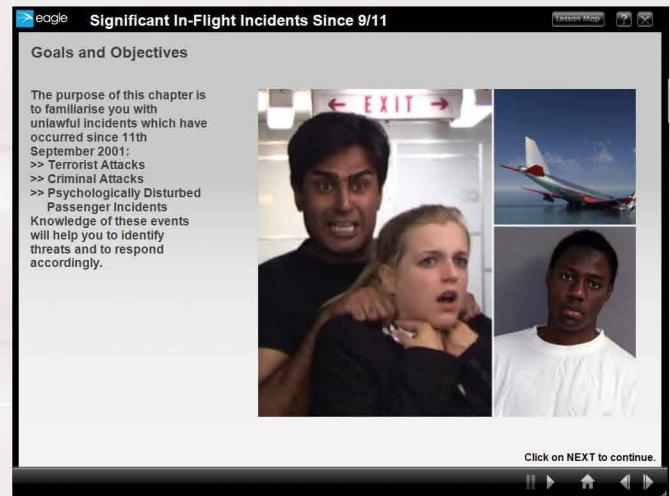

The curriculum is based on international standards, as inferred by Annex 6 to the Chicago Convention. It covers procedures to detect potential problems before take-off, such as the analysis and baselining of passenger behaviour, as well as recommended responses to criminal acts perpetrated by terrorists, criminals and disruptive passengers in the air.

The programme includes weapons and explosives familiarisation, communication techniques, hijack response options and provides guidance so that aircrew can ensure their safety at airports and hotels.

The programme aims to enhance your aircrew's ability to respond to a wide range of threats, including:

- Hijackings
- Disruptive Passenger Incidents
- Bomb Threats
- Laser and MANPADs Attacks

The In-flight Security course will be delivered on the Eagle Computer Based Training (CBT) Platform and available over the web.

eagle | Significant In-Flight Incidents Since 9/11 | Lesson Map

Goals and Objectives

The purpose of this chapter is to familiarise you with unlawful incidents which have occurred since 11th September 2001:
>> Terrorist Attacks
>> Criminal Attacks
>> Psychologically Disturbed
   Passenger Incidents
Knowledge of these events will help you to identify threats and to respond accordingly.

eagle | MANPADS | Lesson Map

What are MANPADS?

MANPADS are:

>> Portable launching pads

>> Carried on the shoulder

>> Used for launching missiles against aircraft.
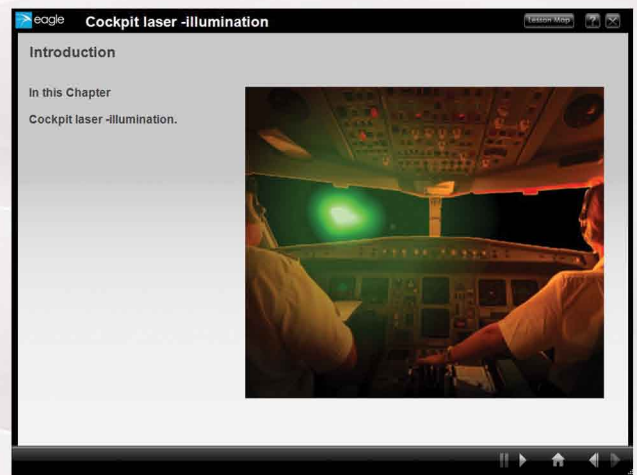

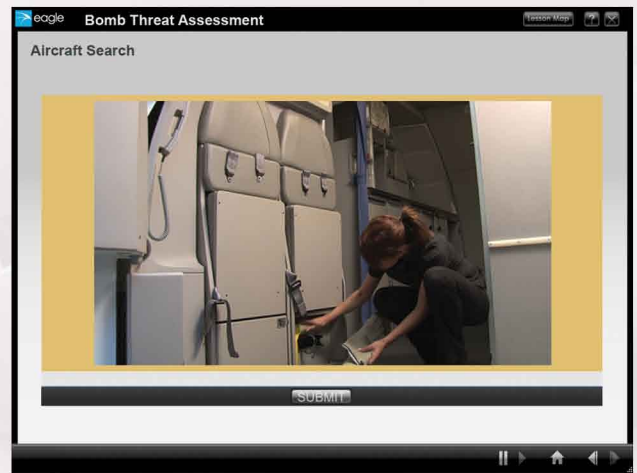

>> Legitimate military weapon

EAGLE COMPUTER-BASED PLATFORM

Eagle is an innovative Computer-Based Training (CBT) platform which offers a unique combination of aviation security expertise, the latest in CBT methodologiesand state-of-the art technology designed by a leading team of software experts, guided by security experts.

LMS TO MEET ALL YOUR TRAINING NEEDS

The Eagle Platform embraces every aspect of training via fully interactive exercises and testing modules. Eagle provides a comprehensive set of courses designed for new and experienced security staff. In addition to the In-flight Security course, the Eagle CBT platform supports a wide range of security training programmes:

- **X-Ray Operators** course with specific modules for checkpoint / HBS / cargo / compliant with the latest EC 185/2010regulation

- **GSAT/SIDA/BSAT** General Security Awareness Training (to train and certify airport ID pass holders)

- **PRM Disability Awareness** Training (with specific modules for customer service and security staff)

- **DetAct** (Detect and Act) detection of suspicious behaviour and signs
